

# BOVINE THERIOGENOLOGY

## Reproductive services that support herd productivity and health

Reproductive efficiency is essential to herd success. The Mizzou Veterinary Health Center provides advanced theriogenology services to support breeding, fertility and pregnancy outcomes in cattle. Our services include:

- » Estrous synchronization
- » Artificial insemination
- » Pregnancy diagnosis
- » Embryo transfer
- » Breeding soundness exam
- » Semen collection, freezing, storage and shipment
- » Diagnostic services for reproductive disease or fertility
- » Ovum Pick-Up (OPU) bovine oocytes
- » Emergency services for dystocia's
- » Transvaginal aspiration of follicles
- » And more!
