

# CANINE THERIOGENOLOGY

## Specialized reproductive care for dogs and breeders

Successful breeding requires more than good timing. Mizzou's theriogenology specialists partner with breeders and veterinarians to support reproductive health, fertility and safe delivery for dogs of all breeds. Our services include:

- » Management for high-risk pregnancies
- » Estrous cycle management
- » Artificial insemination
- » Pregnancy diagnosis  
semen collection,  
freezing, storage and  
shipment
- » Diagnostic services for  
reproductive disease or  
fertility
- » Emergency services for  
dystocia's
- » Elective C-section
- » And more!
